### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 15 March 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

***Detailed Action***

This is the first Office Action corresponding to original filing. The application contains 10 claims.

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Korch et al. (Pat No 6,332,597).

The patent to Korch et al. shows an adjustable bracket installed between two supporting surfaces (22), comprising a universal bracket defined by two elongate elements (40, 44) having substantially the same profile, made of a sheet material in such manner that each of said elements has a relatively broad central part, which is defined by longitudinally flanged edge portions (see Fig. 14), and wherein at the opposite free ends of said respective elements there is provided an end piece (60), the said two

Art Unit: 3632

elements being dimensioned and adapted so that they fit into each other and can be displaced in the longitudinal direction, thus providing a telescopically adjustable "beam" and can readily be adapted to the width between supporting surfaces and can easily be fastened thereto by fasteners (64) provided in the said end pieces.

*Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korcz et al. in view of Harris et al. (Pat No 4,050,603).

The device shown by Korcz et al. shows its end portions bend downwardly. The patent to Harris et al. shows another adjustable bracket having end portions bend upwardly and with more than one opening. It would have been obvious to one skilled in the art at the time the invention was made to have provided the device shown by Korcz et al. with upwardly bent end portions as shown by Harris et al. as an alternative way of securing the bracket, and with more than one opening to provide additional securing means.

Claims 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korcz et al.

Art Unit: 3632

The dimensions and material from which the device is being made are considered to be obvious matter of engineering choice to those skilled in the art having no patentable significance.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Becker et al. (5,934,631), Reiker (5,938,157), Jorgensen (5,954,304) and Korcz (6,098,945) show other examples of adjustable brackets.
